radiation, recording induced radiation, detecting a valuable constituent, comparing the weight fraction of the valuable constituent in a lump with the threshold value of the fraction, and separating the lumps into useful aggregate and worthless material from comparison, characterized in that each lump of the feedstock is exposed to microwave radiation, wherein upon interruption of the exposure with the heat exchanging process between constituents of a target lump being damped, the heating pattern of the target lump is recorded, wherein the weight fraction of the valuable constituent in the target lump is found, wherein the lumps are separated into two streams, one consisting of lumps where valuable constituents are present in an amount less than a predetermined threshold value, while the other stream consists of the lumps where the valuable constituent is present in an amount that is not less than the threshold value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
